THIEN PHU
Web Developer – NodeJS
https://worufu97.github.io

SUMMARY

1-year learning and working experience HTML, CSS, Javascript.

6-month learning and working experience of NodeJS, ExpressJs, PostgresSQL.

Experience in developing web app using HTML/ CSS/ JS, jQuey, Bootstrap, NodeJS/ PHP, Windows app using C# WPF.

Highly capable of researching and learning new technology.

SKILLS

Programming language: HTML5, CSS3, Javascript, C# .NET, PHP.

Frameworks and platforms: NodeJS, ExpressJS, ReactJS, Bootstrap 4, jQuery, Git (Github).

Database: Microsoft SQL Server, MySQL, PostgresSQL.

IDE: Visual Studio Code, Visual Studio 2019, Sublime Text 3.

English: Medium level. Can read/write and understand English documents.

Knowledge: MVC pattern, Single-Page Application, OOP, HTTP protocol, RESTful API. ...

EDUCATION

Nov 2020 - Present
Web Programming with NodeJS
VNUHCM-University of Science & Self Learning
Learning NodeJS, ExpressJS, Bootstrap, Github, PostgreSQL, ReactJS, Single Page Application. Continue to improve knowledge about Javascript ES6, jQuery.

Sep 2020 - Dec 2020
Web Programming with PHP
VNUHCM-University of Science
Learning HTML, CSS, Javascript, jQuery, AJAX, PHP, MySQL database and improve my application programming skills, MVC pattern.

Apr 2020 - Jul 2020
Database and C# WPF Programming
VNUHCM-University of Science
Learning about MSSQL database, application programming with C# WPF, basic testing, MVVM pattern.

Aug 2019 - Nov 2020
Data Structure and Algorithms
VNUHCM-University of Science
Learning OOP with C++ language, learning about design patterns. Understanding more about data structures in programming: pointers, stacks, queues, trees... and algorithms: sorting, searching and basic graph.

Sep 2018 - May 2019
Start Learning Programming
VNUHCM-University of Science & Self Learning
Learning basic programming with C, C ++ language. Basic Python self-learning.

PROJECTS

- **Notoli Watch (Website) - Dec 2020**
  PHP, HTML5, CSS3, Javascript, AJAX, Bootstrap 4, MVC, MySQL, Chrome DevTools
  E-commerce website, selling watches. My first web programming project, using server-side PHP language, MVC pattern, increasing user experience with AJAX, full of basic functions: login, registration, product filtering, search, order, send mail, ...
  Source code: https://github.com/worufu97/notoli-watch-wpf

- **Notoli Shoes (Windows App) - Nov 2020**
  WPF C# .NET, LiveCharts, Apose, EtityFramework, MVVM, Microsoft Server SQL
  Subject project "Management Application Programming". Shoes store management can either start from an existing master data or create a completely new one, using the database, MVVM pattern, and a few other libraries.
  Source code: https://github.com/worufu97/notoli-shoes-wpf

- **Cake Shop (Windows App) - Jul 2020**
  WPF C# .NET, LiveCharts, Material Design
  Cake shop management project with basic functions, invoice generation and sales statistics, end-of-course "Windows Programming".
  Source code: https://github.com/worufu97/cake-shop-wpf

- **We Split (Windows App) - Jun 2020**
  WPF C# .NET, LiveCharts
  The second project belongs to the subject "Windows Programming". Utility apps while traveling in groups, managing money during the trip and storing travel memories.
  Source code: https://github.com/worufu97/we-split-wpf

- **Food Recipes (Windows App) - May 2020**
  WPF C# .NET
  My first project. This is one of the three projects in the course "Windows Programming - A basic recipe storage app.
